SUMMARY

I am an inventive software engineer. I specialize in creating intuitive, responsive, and visually appealing user interfaces. I am an enthusiastic InformationTechnology professional with keen interest and experience Software development. I'm a highly skilled and results-driven Software Engineer with experience in designing and developing robust, efficient, and scalable software solutions. I collaborate with cross-functional teams and use cutting-edge technologies to tackle complex challenges. I'm committed to delivering innovative solutions that enhance user experiences and drive business growth. I'm passionate about staying current with emerging trends and continuously expanding my skillset to deliver high-quality software that meets and exceeds client and company objectives.

EXPERIENCE

1. Technical Support, 03/2021 - 07/2021

Nairobi Women's Hospital

Worked as an intern for at **Nairobi Women's Hospital** where I was tasked with:

- Updating and maintaining the System
- Testing and evaluating new technology to ensure efficiency and that the system runs as intended.
- Monitoring and maintaining computer networks.
- Researching trends to stay updated with the latest technology, avail of resources and apply best industry practices.
- Teaching the users how to use and interact with the system
- Customizing desktop applications to provide accessibility and simplify user needs.
- Working together with a team to ensure the safety of the organization's digital assets through the installation of firewalls, and educating the users about the best security practices.

2. Software Developer, 03/2023 - 10/2023

Suvence, Nairobi, Kenya

- Used extensive practical and theoretical understanding of various coding languages to aid the development of PMS software.
- Designing the UI/UX of the PMS I was developing.
- Review the code to check quality and suggest improvements.
- Maintaining the code.
- Helped run quality assurance (QA) ahead of deployment of various software and security measures.
- Managed and updated databases using database interactive languages like SQL.
- Contributed to engineering teams focused on cloud infrastructure, systems programming and operating system feature development.

3. **Frontend Developer**, 11/2023 -04/2024
PCEE, Nairobi, Kenya
- Write, clean and dynamic code, leveraging expertise across multipleprogramming languages to meet diverse requirements.
 - Support software code review, system integration and validation in line with company andregulatory requirements.
 - Build and maintain code libraries used to produce consistent and reliable code.
 - Partner with engineering team to check and optimize interfaces between hardware andsoftware applications.
 - Keep the code quality high.
4. **Freelancer** - Part-time
